

# Explore Snake Creek Canyon History

8-8-88

Wasatch Mountain State Park has been presenting interpretive programs every Friday and Saturday night this summer. This Friday, there will be a special program in the Visitor Center presented by Jerry Springer, of Midway.

Jerry has been spending a lot of time researching the mining history of the Wasatch Mountains and has been traveling to many of the national parks in Utah lecturing on the subject. He has put together numerous slide shows and has collected many mining artifacts.

Friday, Jerry will show a slide show on the history of Snake Creek Canyon at 9 a.m. The program is free and welcome to everyone. This will be a great opportunity for you to learn more about the history and early mining days in our mountains.
